

ecoBLEND

PREMIUM BLEND COARSE & FINE MEDIA

Madimack ecoBLEND offers a commercial grade, sustainable media filtration solution for all pool shapes and sizes. Offering a unique combination of 60% fine / 40% coarse premium glass media, ecoBLEND is the optimal solution to reduce clogging, improve filtration and keep your pool water sparkling clear. Made from recycled glass, ecoBLEND supports the removal of debris and bacteria from your pool water efficiently.

Industrial Grade Glass

Three stages of refinement and quality control to deliver outstanding filtration results

Longevity

Minimal maintenance with an extended media lifespan, helping reduce media turnover

Premium Blend

60% Fine / 40% Coarse

The engineered blend of fine & coarse glass media supports optimal filtration performance

Eco-Friendly

Made with premium-grade recycled glass for an environmentally conscious choice

Versatile Use

Suitable for both residential and commercial pools.

madimack

Use Madimack's premium **ecoBLEND** glass media in your filter.

Available in 15kg bags with a balanced 60% fine and 40% coarse glass ratio, EcoBLEND helps reduce bacterial growth and extend the life of pool filters.

EcoBLEND works best with **Madimack's eliteCLEAR** pool media filter

CONTROL VALVE MAIN FUNCTIONS

Filter: For normal filtering and routine vacuum cleaning.

Backwash: For cleaning filter when pressure gauge rises to 0.7kg/cm above start up pressure. Stop pump and turn valve to **BACKWASH**. Start pump until water in sight glass is clear. Approximately 2 minutes or less depending on dirt load. Proceed to rinse.

Rinse: Stop pump and turn valve to **RINSE**. Start pump for 30 seconds. Stop pump and turn valve to **FILTER** for normal operating.

To get the best results from your filtration system, please read the owner manual carefully.
